## SEMINAR ON LONG-TERM ECOLOGICAL RESEARCH IN EAST ASIA PACIFIC REGION (EAP-LTER2012)

*"Challenges of environmental monitoring  
towards sustainability"*

4 - 5 July 2012

FOREST RESEARCH INSTITUTE MALAYSIA (FRIM)

Jointly-organized by:

## BACKGROUND

Long-Term Ecological Research provides an important framework for the promotion of ecological and ecosystem sciences. It also delivers the scientific insights and knowledge for the benefits of humanity and its environment. With the increasing global change in the environment and economic conditions, long-term ecological research may provide the scientific support required by the decision makers to manage its resources for the benefit of current and future generation. Database management is also becoming more important over the years as information gathering through long-term ecological research are increasing, while new analytical tool are being developed.

It is our great pleasure to host the seminar on Long-term Ecological Research in the East Asia Pacific. This seminar will be held in conjunction with the 9th Regional ILTER/EAP-LTER2012 Conference. It is an ideal platform to discuss issues on the various aspects of ecosystem and ecological monitoring. It is hoped that this conference will act as a forum to promote networking among researchers/experts and practitioners related to long-term ecosystem monitoring.

## OBJECTIVES

- To explore, exchange and update current scientific information on the various approaches of ecosystem monitoring.
- To examine the role of information management in promoting sustainable ecosystem.
- To provide a forum for researchers, academicians and practitioners in long term ecosystem monitoring.
- To present and share findings and experiences on the ecosystem studies.

## TOPIC/SCOPE

The organizers cordially invite oral and poster presentations in the following fields:

- Ecosystem monitoring
- Climate change and ecosystem services
- Ecological information management
- Analytical tools
